Web Development
Talent Tree

UX → Plan → Design → Proto-type → Build → Test

HTML → DOM → Shadow DOM
HTML → Back End Development Servers, Databases → Browser → SEO

DOM → Tags → STYLE CSS → SCRIPT JS

Tags → IDs & Classes → Forms → Validation
Forms → Media → Data Attr → SVG → Canvas → Mark down

STYLE CSS → Colors → Fonts → Sprites → Anim. Trans.
STYLE CSS → Box Model → Layers → Grids → SASS → RWD → BEM

SCRIPT JS → Vars → Fxns → Loops → Switch → Callback → event binds → name space → closure → proto types
SCRIPT JS → jQuery I → jQuery II → jQuery UI → AJAX → API

Browser → Support → Dev Tools → Debug → Performance → Speed → Page Size → Paints → FPS
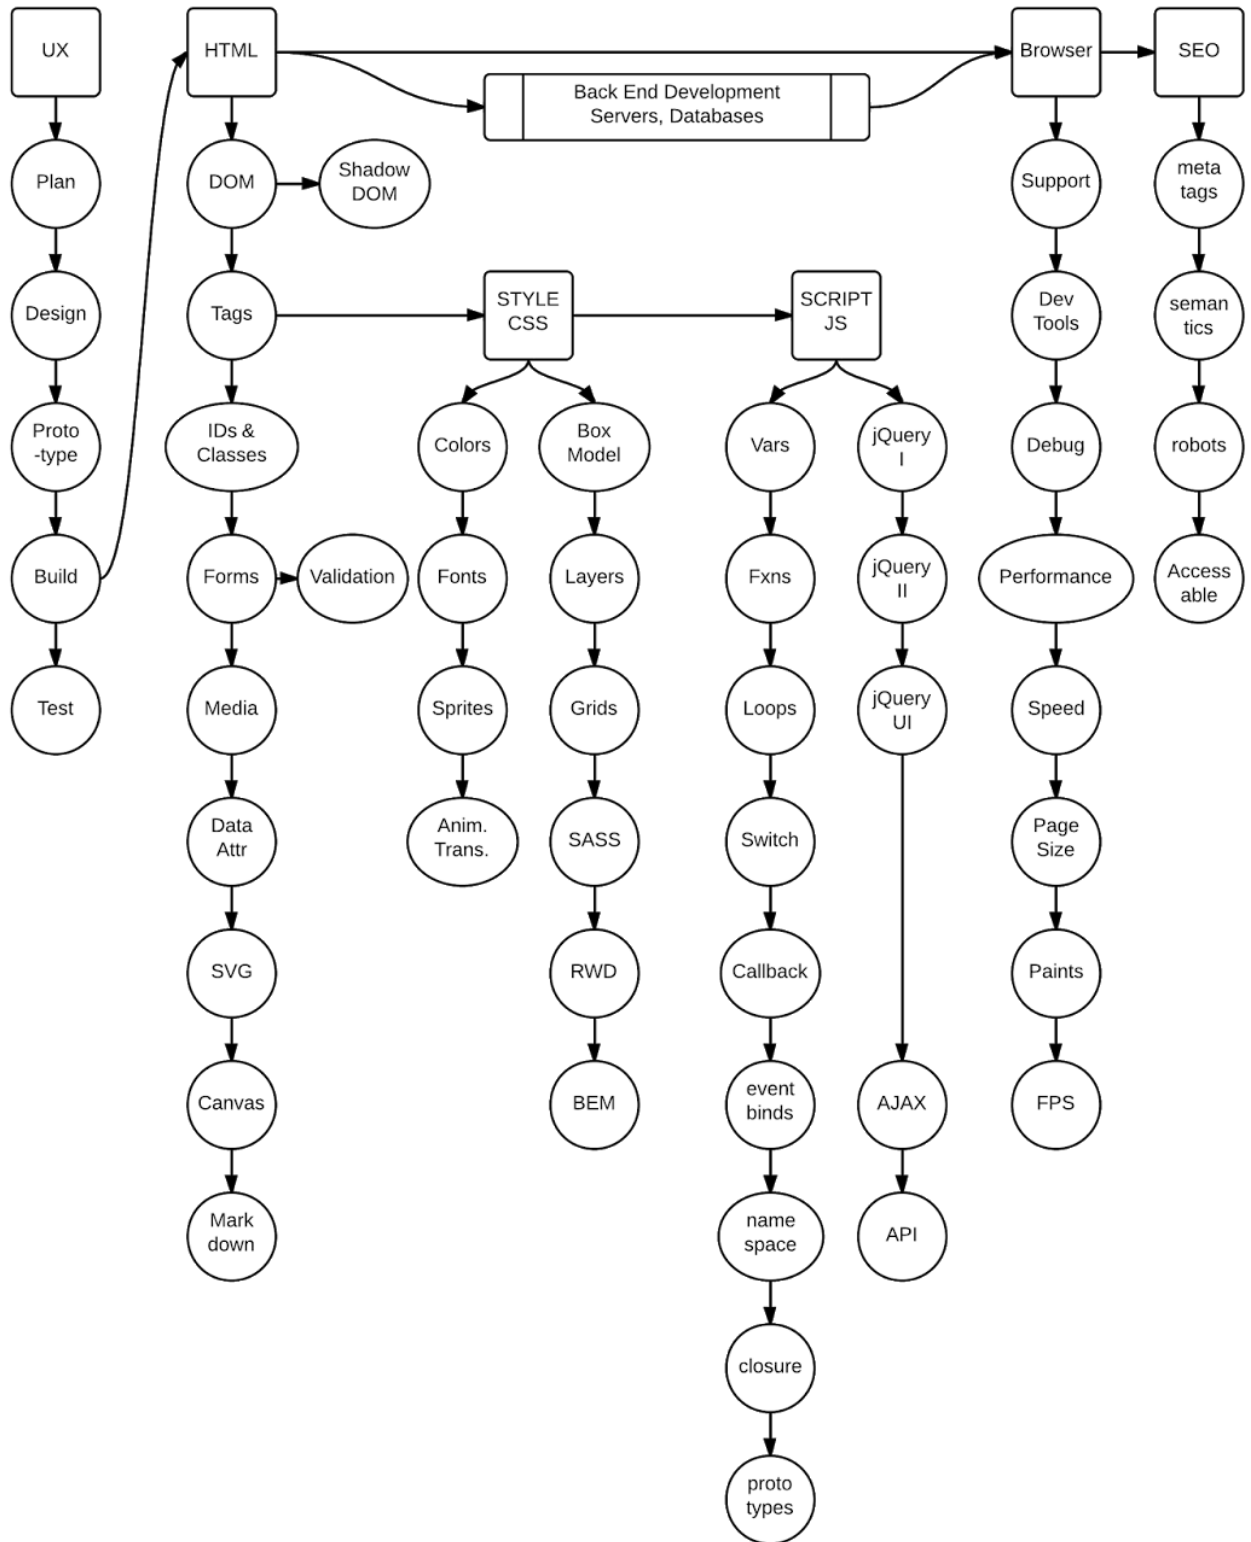

SEO → meta tags → semantics → robots → Accessable

jQuery I : You are familiar with manipulating the document object model (DOM) - modifying values, content, properties, entire elements, etc.
jQuery II : You are familiar with adding standard animation to a web page.
